

FULL STACK WEB DEVELOPMENT with Django and React JS

MD FAHMID BIN MOSTAFA

Table of index

Chapter 1: Introduction to Web Development	01
1.1 What is Web Development?	01
1.2 Frontend, Backend, and Full Stack	01
1.3 How the Web Works: A Simplified View	02
1.4 Why Django and React?	02
1.5 Skills of a Full Stack Developer	03
1.6 Roadmap of This Book	03
1.7 Why Learn Full Stack Development?	04
Chapter 2: Setting Up Your Development Environment	04
2.1 Why Setting Up Your Environment Matters	04
2.2 Essential Tools You'll Need	05
2.3 Installing Python	05
2.4 Installing Django	06
2.5 Installing Node.js & npm	07
2.6 Installing React	07
2.7 Installing Visual Studio Code (VS Code)	08
2.8 Installing Git & GitHub Setup	08
2.9 Installing a Database (Optional for Later)	09
2.10 Final Checklist	09
Chapter 3: HTML Basics	09
3.1 Introduction to HTML	10
3.2 Anatomy of an HTML Document	10

3.3 Headings and Paragraphs	11
3.4 Links and Images	11
3.5 Lists	11
3.6 Tables	12
3.7 Forms	12
3.8 Semantic HTML	13
3.9 Best Practices in HTML	14

Chapter 4: CSS Fundamentals 14

4.1 What is CSS?	14
4.2 Ways to Add CSS	15
4.3 CSS Syntax	15
4.4 CSS Syntax	16
4.5 The Box Model	16
4.6 Positioning	16
4.7 Flexbox Basics	17
4.8 Colors and Units	17

Chapter 5: Responsive Design with CSS 18

5.1 What is Responsive Design?	18
5.2 Mobile-First Approach	18
5.3 Media Queries	18
5.4 Responsive Units	19
5.5 CSS Grid for Layouts	19
5.6 Responsive Images	20
5.7 Best Practices for Responsive Design	21

Chapter 6: Tailwind CSS Essentials 20

6.1 What is Tailwind CSS?	20
6.2 Installing Tailwind CSS	21
6.3 Core Concepts	22
6.4 Responsive Design with Tailwind	22
6.5 Customizing Tailwind	22

Chapter 7: JavaScript Basics 23

7.1 What is JavaScript?	23
7.2 Variables & Data Types	23
7.3 Operators	24
7.4 Functions	24
7.5 Control Flow	24
7.6 Arrays & Objects	25

Chapter 8: DOM Manipulation & Events 25

8.1 What is the DOM?	25
8.2 Selecting Elements	25
8.3 Modifying Elements	26
8.4 Creating and Removing Elements Dynamically	26
8.5 Events in JavaScript	26
8.6 Example: Simple To-Do List	27

Chapter 9: JavaScript ES6+ Features 27

9.1 Introduction to ES6+	27
9.2 let and const	27
9.3 Template Literals	28
9.4 Arrow Functions	28
9.5 Destructuring	28
9.6 Spread & Rest Operators	29
9.7 Modules (Import/Export)	29

Chapter 10: Asynchronous JavaScript & APIs 29

10.1 Synchronous vs. Asynchronous	29
10.2 Callbacks	30
10.3 Promises	30
10.4 Async/Await	31
10.5 Fetch API	31

Chapter 11: JavaScript Project –Weather App 32

11.1 Project Overview	32
11.2 Setup HTML	32
11.3 JavaScript Logic	32
11.4 Styling with Tailwind	33
11.5 Features	33

Chapter 12: Introduction to Django (Backend Development) 33

12.1 What is Django?	33
12.2 Installing Django	34
12.3 Creating a Django Project	34
12.4 Project Structure	35
12.5 Creating a Django App	35
12.6 First View	35
12.7 Django MTV Architecture	36
12.8 Django Admin	37

Chapter 13: Django Models & Database ORM 38

13.1 Introduction to Django Models	38
13.2 Defining a Model	38
13.3 Applying Migrations	38
13.4 Using Django ORM	39
13.5 Registering Models in Admin	39

Chapter 14: Django Views & Templates 40

14.1 Views in Django	40
14.2 Templates in Django	40
14.3 Template Language Features	40
14.4 Class-Based Views	40

Chapter 15: Django Forms & User Input 41

15.1 Introduction to Forms	42
15.2 Creating a Django Form	42
15.3 Handling Forms in Views	42
15.4 Template for Form	42
15.5 CSRF Protection	43
15.6 Django Form Validation	43

Chapter 16: Django Authentication & User Management 43

16.1 Introduction to Authentication	43
16.2 Creating User Registration	44
16.3 Login and Logout	45
16.4 User Authentication in Views	46

Chapter 17: Static Files & Tailwind Integration in Django 46

17.1 Introduction to Static Files	46
17.2 Configuring Static Files	46
17.3 Using Tailwind CSS in Django	47
17.4 Linking CSS in Templates	48

Chapter 18: Django Project – Blog Application 48

18.1 Project Overview	48
18.2 Creating the Blog App	48
18.3 Views for Blog	49
18.4 Templates with Tailwind	49
18.5 URL Configuration	50
